

According to the CDC, the flu kills between 3,000 and 49,000 Americans every year. It is important to be **prepared** and take the required steps to **clean and disinfect** for each and every obstacle that we're being faced with—whether it's a common cold, Norovirus, or influenza—**Spartan** provides you with the products necessary to stay **as safe and healthy as possible**.

## Infection Prevention

**1 Hand Hygiene**

**2 Clean & Disinfect**

**3 Personal Protective Equipment**

## Infection Transmission

**Direct contact with blood and/or bodily fluids**

**Direct contact with a contaminated surface (High-Touch Surfaces)**

**Exposure to airborne infectious agents<sup>1</sup>**

## Stop the Spread of Infection!

Today's cleaning professionals are on the front lines of helping to prevent the spread of infection. Rely on Spartan Chemical to provide targeted solutions for infection control. Hand washing and sanitizing solutions are your first line of defense against the spread of viruses. Effective cleaners and disinfectants break the cycle of infection on high-touch surfaces. Training and education tools ensure safety, professionalism, and compliance. Your world is busy enough. Count on Spartan Chemical for products and services that make infection control simple.
