Keep Your Facility Clean, Safe and Accident Free with

ICE MELT AND SNOW REMOVAL PRODUCTS

Ice and snow can cause employees and customers to slip and fall outside your facility, increasing injury claims or worse. While the weather is beyond your control, reducing the risk of snow and ice-related accidents isn’t. Protect your people with the proper ice melting products, application tools and cleanup items when the weather turns cold enough for it to be white outside.

What to Consider When Choosing Ice Melt

**Melt Temperature**
Ice and snow melting products are effective to specific temperatures. For example, one blend may work to only -5°F while another may work at -25°F. Understanding your climate and current weather conditions is important to choosing the right product for your application.

**Accelerants**
Accelerants are organic additives that are added to ice melt products to speed up or accelerate the melting process, ensuring a safer surface sooner.

**Color**
Color is added to ice melt so the person applying it can see it. With colored pellets you can more easily achieve even distribution, with less waste from over-application.

**The Environment**
Most ice melt blends will not harm vegetation or animals when used according to label and instructions.

Types of Ice Melt

**Liquid Anti-Icers**
Use for anti-icing prior to a storm. Liquid ice melt, like Triple Melt® Liquid reduces overtime and after-storm cleanup. It prevents the bonding of snow and ice to the pavement for easier removal with blade or shovel, and significantly reduces the amount of after-storm granular ice-melt needed. If applied prior to a storm, liquid ice melt can melt snow while it’s falling. Don’t apply if surface is already 10°F or below. Apply liquid anti-icers with our Walk-Behind Liquid Sprayer, Item# LQ9500L.

**Blended Ice Melt**
Blends allow you to melt snow and ice based on temperatures and conditions. They contain a blend of various chemicals or compounds to speed up the melting of ice, and can often have an accelerating chemical blended in as well. Nassco® offers three blended ice melters to suit your needs:

1. **Titan®** – Our most popular and economical choice. In granular form, Titan® Ice Melter includes a bio-based melting accelerator, is blue in color and melts down to -5°F.
2. **Ice Brute®** - For sensitive environmental areas. Ice Brute® includes a bio-based melting accelerator. All dyes have been removed for a more environmentally friendly product. Ice Brute melts down to -15°F.
3. **Triple Melt®** - The most aggressive blended granular product available, Triple Melt® includes two powerful melting accelerants, is blue in color, and melts down to -15°F.

**Calcium Chloride Based Pellets**
Peladow® Calcium Chloride and Ice Foe® are best for the most demanding conditions and lowest temperatures. With aggressive melt temperatures of -25°F, these products melt snow and ice in the coldest days and help prevent refreezing. When used as directed, they leave no white powdery residue and have low to no impact on concrete, sidewalks, roads, tires, floors or carpeting.

Walk-Behind Liquid Sprayer
- Use with Triple Melt® liquid de-icers, #LQ6405TM and #LQ6425TM
- Apply liquid ice melt ahead of storms with our Walk-Behind Liquid Spray
- Sprays a standard 4’ sidewalk in one pass
- Hose and spray wand treat outdoor steps
- 5 gal tank treats 5000 sq ft of sidewalk
- Corrosive resistant all-plastic body
- Rechargeable 12V non-spillable battery

ICE AND SNOW REMOVAL

Heavy-Duty Aluminum Snow Pusher
- 12” x 24” blade
- 42” yellow poly D grip wood handle
- Heavy-duty aluminum blade is strong, durable and lightweight
- Rust and corrosion resistant
- 12-gauge steel pusher heels are the sturdiest in the industry

Aluminum Snow Shovel
- 15” x 18” blade
- 36” yellow poly D grip wood handle
- Economical utility shovel

Ice Scraper
- 4.5” x 7” blade
- 48” wood handle

Pricing effective through March 30th, 2017.
ICE MELT DISPENSING, SPREADING AND APPLYING

Nassco® is making it faster and easier for your facility to manage icy storms with convenient dispensing and application systems for ice melt. Keep a supply of granular ice melt in a 20 gallon Rubbermaid® BRUTE® receptacle near each building entryway. Scoop it out with your Nassco® Deluxe Measuring Scoop. Apply ice melt on sidewalks and in small areas with our Handi-Spreader. Or, beat storms to the punch by applying liquid ice melt with a Pump-Up Sprayer.

Handi-Spreader
- Covers area 6’ to 12’ wide with 3 settings
- Capacity of 6-lbs. pelletized material
- Rust and corrosion-proof

Chemical Resistant Pump-Up Sprayer
- 2-gal capacity with 12” brass wand
- Carrying strap and locking handle
- Twist to pump operation
- Full brass shut-off valve and extension wand

ICE MELT RESIDUE CLEANING CHEMICALS

Ice melt compounds can leave a film on facility floors. Be sure to neutralize and remove this harmful residue with a neutralizer. Nassco® Ice Melt Neutralizer can also be used in extraction machines to remove sticky salt from carpets and entrance matting.

Nassco® Pro Series 30 Neutralizer, and Concept 915

- Removes ice melt residue from carpets and floors
- Eliminates unattractive white haze to ensure superior gloss, durability and appearance of floors
- Protects and extends the life of any floor finish by removing surface alkalinity and abrasive residue
- Nassco® Neutralizer: Dilute 1:64
- Concept 915: Fill mop bucket with 3 to 5 gallons of water and add 1 packet

Labor represents 90% or more of the total cost of floor cleaning. Reduce your labor cost on ice melt and residue cleanup by using the most productive floor and facility cleaning equipment available.

### Viper Racer™ Air Mover
- 3 speed
- 1/3 hp motor
- Built in handle and wheels
- Two GFCI outlets

### Viper Shovelnose™ Wet/Dry Vac
- 18 gallon capacity
- 24” front-mount squeegee assembly
- 10” stair-climbing wheels with 9’ hose
- Easy-to-use fingertip controls

### Advance Adgility™ 10XP Backpack Vacuums
- Flexible, crush proof 1-1/2” hose
- 56’ 2-piece S-bend aluminum wand
- Upholstery and crevice nozzles
- 14” Quick-Glide floor tool
- Padded, adjustable belt system

### Sanitaire® Quick Kleen Upright Vacuum
- 12” cleaning path with dirt cup system
- 7 amp motor and 50’ cord
- Quick Kleen fan chamber and other easy maintenance features

MATTING

Entrance or walk-off matting will prevent about 90% of soil from entering your building. Interior and exterior mats should always be part of your floor and facility maintenance program, for the safety of people and the protection of your floors.

*The above represents Nassco’s most popular sizes. Many other options are available and delivered in 10-14 days.

Because of the many combinations of size, color, shape, fabric, thickness and type of matting, it’s best to let an experienced Nassco® professional help design a custom matting program for your facility. We will do a walk-through of your building with you and discuss the areas and ways that various types of mats can help increase productivity and protect both floors and people. Shown is a small sample of the options available. Call us at 800-729-6726 to schedule a consultation.
