Chemical Management Solutions

**Spotless floors.
Safe passageways.
Unobstructed views.**

Take the guesswork out of mixing, dispensing and using chemicals with safe, accurate 3M™ Chemical Management Solutions.

Right amount of solution. Right amount of clean.

3M™ Flow Control Wall Mount System.

Featuring unique flow control technology, the 3M™ Flow Control Wall Mount System delivers accurate cleaning solutions directly into your containers, minimizing worker interaction with chemicals.

So whether you're cleaning a hospital, classroom, office building or retail space, you know you're getting the right amount of chemicals to do the job right.

- At least 60% more accurate dilution¹
- 17–49% more compact,² while holding up to four half-gallon bottles
- Simple dispensing dial improves safety and productivity
- 3-point locking system limits chemical exposure and helps prevent theft
- Compatible with 25 different 3M™ Cleaning Concentrates
- Compact size measurements: 12.25" w x 22.5" h x 6.3" d

The 3M™ Flow Control Portable Dispensing System.

Reusable, portable dispensers are designed for durability, comfort and the same accuracy as the wall dispenser.

- Improved flexibility, convenience and staff productivity
- Designed for half-gallon bottles of 3M™ Cleaning Concentrates
- Foaming adapter sold separately

A simple twist mixes any chemical you need.

3M™ Twist 'n Fill™ Cleaning Chemical Management System. ▶

The 3M™ Twist 'n Fill™ System makes diluting solutions easier and safer. A single dispenser accurately dilutes and dispenses virtually any cleaning solution. Just pick a chemical concentrate. Insert your bottle. Twist and fill. Simple. Efficient. *Accurate.*

- Fits almost any cleaning closet
- One dispenser mixes over 30 chemicals
- Change out chemicals in seconds
- Air gap prevents backflow

¹The 3M™ Flow Control System (FCS) is 60% more accurate on average at diluting chemical concentrates than the nearest competitive system when used under laboratory conditions at water pressures ranging from 20 to 120 psi.

²The 3M™ Flow Control System is 17–49% smaller in cabinet size volume than the four competitive four-bottle dispenser systems tested.

Simple, effective clean.

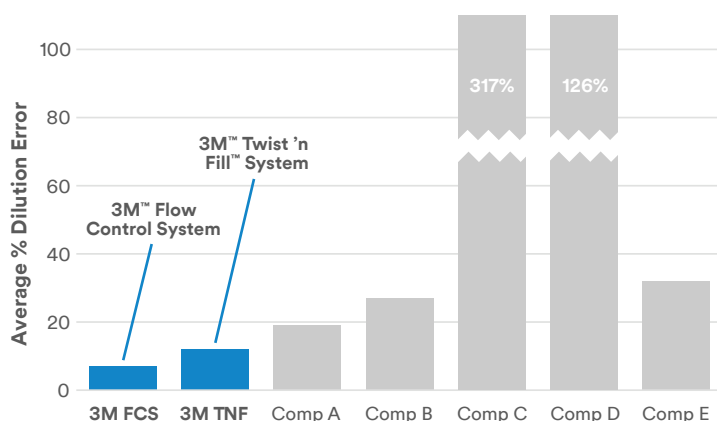

Accurate dilution is critical for cleaning efficiency and effectiveness.

Concentrations too high not only waste chemicals and drain your budget, but can also damage the surfaces you're trying to clean. And concentrations too low may not meet the high standards of hygiene and cleanliness you need.

3M™ Chemical Management Solutions simplify mixing and eliminate the problems of over- or under-dilution. Compact and easy to use, these indispensable dispensers take the guesswork out of mixing.

3M has the lowest dilution error of six leading competitive systems.

(Dispensers tested over a dynamic water pressure range of 20–120 psi)

Making cleaner greener.

3M™ Chemical Management Solutions can help you meet your sustainability goals:

Improved dilution accuracy reduces waste and minimizes chemical use.

Many 3M™ Cleaning Concentrates are Green Seal™ Certified, and all are concentrated to maximize value and cut packaging waste.

Cold water mixing cuts energy use and improves safety.

Many 3M™ Cleaning Concentrates are packaged in bottles made with 25–35% post-consumer recycled content.

Using 3M™ Chemical Management Solutions can help contribute to LEED certification.

NEW!

Disinfect surfaces faster with 3M™ MBS Disinfectant Cleaners.

3M™ MBS Disinfectant Cleaners can help you properly eliminate pathogens while cutting your disinfecting time in half, compared to other cleaners. Application methods that fit your needs make your job even easier, which means healthcare facilities can provide more people with the care they need.

- Versatile applications: Can be applied on hard non-porous surfaces by thoroughly wetting surfaces with a cloth, mop, sponge, sprayer or by immersion
- Use with 3M™ Flow Control and 3M™ Twist 'n Fill™ Dispensing Systems
- 5-minute contact time
- Fresh Scent/Dye option (41)
- Low Odor/Dye-free option (42)
