AccuWipe® MicroPremium™ 29956

AccuWipe® Premium 29856

AccuWipe® Recycled 29756

Definition & Functionality: AccuWipe® Delicate Task Wipers are tissue-based wipers for the delicate cleaning of lens, surfaces, and equipment in labs, research facilities, hospitals, and manufacturing settings.

Differentiation: Versus KC's virgin fiber Kimwipes®, the AccuWipe® product line offers a 3 substrate solution: 1) AccuWipe® MicroPremium™ – made with GP's proprietary microfiber tissue technology for the best wipe clean performance (leaves less surface residue), 2) AccuWipe® Premium –

made of 100% virgin fiber for performance similar to KC Kimwipes®, and 3) AccuWipe® Recycled – made with 100% recycled fiber for a "green" alternative to virgin fiber for less delicate cleaning tasks.

Reason to Buy: *End users* – should buy for a better performing product in wipe clean, wet lint, and strength (AccuWipe® MicroPremium™) and more product options tailored to user-specific needs. *Distributors* – should buy to increase volume and margins in this large and profitable market and to simplify operations because AccuWipes® ship with GP's TTW.

AccuWipe® MicroPremium™

- Made with GP's microfiber tissue technology for ¹ superior wipe clean performance (leaves less surface residue), lower wet lint, and superior strength than KIMTECH Science® Kimwipes®

USE: High-end delicate cleaning

- Gentle on Surfaces
- Low Lint
- Wipes Clean
- Strong & Absorbent

AccuWipe® Premium

- Made with 100% virgin fiber, like KIMTECH Science® Kimwipes® but with ² superior wet and dry strength and lower wet lint

USE: Delicate cleaning

- Gentle on Surfaces
- Low Lint²
- Wipes Clean
- Strong & Absorbent

² Based on industry-standard lab tests of 1-ply

AccuWipe® Recycled

- Made with 100% recycled fiber ³ for an environmental alternative to virgin fiber wipers

USE: General cleaning

- Gentle on Surfaces
- Low Lint
- Wipes Clean
- Strong & Absorbent

³ Made with 100% recycled fiber. May contain incidental <.05% non-recycled fiber.

¹ Based on independent and industry-standard lab tests of 1-ply
