High-capacity Compact® tissue helps reduce change-out frequency compared to standard roll tissue products and requires half the storage space.

Compact® 1-Ply – For our most cost-conscious customers; lower cost per sheet than 2-ply

Compact® 2-Ply – For customers who prefer a 2-ply product

Compact® tissue products reduce 95% of packaging waste per case than GP's standard roll bath tissue. To be specific, Compact® coreless tissue dispensers can reduce as much as 7.8 lbs. of waste of Georgia-Pacific 2-ply standard roll bath tissue.

¹4.75" – Standard roll diameter in a 36 roll case

²5.75" – Larger diameter roll to increase labor savings (fewer change-outs due to higher capacity per roll) and smaller case footprint reduces storage space required

Sustainability

- Compact® coreless tissue products 19375 and 19378 are EcoLogo® Certified and meet the EPA Guidelines for Post-Consumer fiber content (20%). Meets or exceeds EPA Comprehensive Procurement Guidelines.
- Compact® coreless tissue products minimize the impact on the environment by using recycled fiber and reducing waste; minimum 95% recycled fiber
- Compact® tissue products eliminate roll cores, cardboard shipping boxes and individual product wrapping

Productivity

- Compared to standard roll bath tissue, Compact® Tissue Dispensers and tissue products control labor costs by dispensing up to 1,500 sheet 2-ply or 3,000 sheet 1-ply coreless bath tissue rolls (reduced roll changes)
- Compact® tissue combined with Compact® coreless tissue dispensers allows for nearly 100% roll utilization

Image

- Compact® Tissue Dispensers coordinate with GP enMotion® Towel Dispensers, Softpull® Towel Dispensers and enMotion® Soap Dispensers
- The stainless steel dispensers coordinate with GP enMotion® Stainless Recessed Automated Touchless Towel Dispenser and other stainless products
