

PRO SERIES

HARD FLOOR CARE SOLUTIONS

“Nassco really saved us a lot of time, a lot of energy, a lot of work”

PRODUCT SELECTION MADE EASY

A good floor care program is intended to protect the life, appearance and investment of one of your most expensive and noticeable building assets. Planned right, it will pay you back not only in a more beautiful building, but also in improved occupant safety, a healthy work environment, positive customer perception, and reduced labor.

Selecting amongst the many products available may seem daunting. So we've created this product selection book to guide you through the process of choosing the best products and tools for your individual program.

What type of floor surface do you have?

Stone Floors - turn to page 8.

Simply put, the 3M™ Scotchgard™ Stone Floor Protection System is the best way to care for terrazzo, marble, polished concrete and other natural stone for exceptional long-term labor savings and productivity.

Wood Floors - turn to page 9.

Wood floors, including gym flooring, need special care. Our Sport Kote® chemical system, paired with the right floor pads, applicators and equipment, is designed to meet your every need in this area.

Resilient Floors - start on page 5.

A complete maintenance and care program for resilient floors - vinyl, sheet vinyl, vinyl composite tile (VCT), linoleum - will include components for stripping, finishing, restoring and maintaining floors.

Neutralizers & Floor Cleaners	12	Tile & Grout Cleaning Equipment	20
Floor Enhancers	13	Safety and PPE	23
Restorative Maintenance			
Floor Preparation Pads	13		

“They increased our productivity tenfold”

Prevention is always cheaper than restoration. A good comprehensive program should include entrance or walk-off matting to prevent soil and moisture from entering buildings, as well as furniture protectors and other items to protect floors from unnecessary scuffs and scratches. **See page 4 for preventative maintenance items.**

Resilient Floor Care is a continuing cycle with 4 areas of maintenance you need to tend to, with more or less frequency.

1

Regular Maintenance

2

Interim Maintenance

3

Restorative Maintenance

4

Chemical Strip Out

Most frequent and least expensive, every program should include daily dust or damp mopping, and preferably use of an autoscrubber. This type of cleaning will help extend the maintenance cycle so that the more expensive procedures will need to be done less frequently. Some programs may also include regular burnishing.

When floors still have a decent amount of finish but have lost their gloss and are not responding to burnishing, it's time for a finish gloss repair or enhancement to bring them back to their original shine.

When the first two steps no longer work effectively, a scrub and recoat procedure will be in order. In this step you'll remove two to four coats of finish and reapply more.

When floors are deeply scratched, yellowed, or so beat up that any of the other maintenance procedures just aren't enough, it's time to start fresh by chemically stripping and refinishing your floors.

Here's a synopsis of what steps and products may be included in the 4 areas of maintenance above, and where you can find more information about it in this booklet.

	Procedure	Primary Chemical	Pad	Tools and Applicators
1 Regular Maintenance	Damp Mop	Neutral Cleaner - p.12	5100 or Nassco® Red - p.14-15	Damp mop & bucket - p.18-19 Auto scrubber or floor machine - p.20-21
	Dust Mop	No chemical needed	No pad needed	Dust mop or system - p.17
2 Interim Maintenance	Burnish	No chemical needed	3100-3600 Series - p.14-15	Floor burnisher - p.20
	Gloss Enhancement	Gloss Enhancers - p.13	3300 Natural Blend - p.14-15 5100 or Nassco® Red - p.14-15	Floor burnisher - p.20 Auto scrubber - p.21
3 Restorative Maintenance	Deep Scrub	Neutral Cleaner - p.12 or no chemical	SPP or Nassco® Prep Pad - p.13	Auto scrubber - p.21 Orbital floor machine - p.20 Doodlebug - p.13 Dust mop or system - p.17
	Recoat	Use same finish - p.5-7	No pad needed	Finish mop & bucket - p.16 and 19 Air mover - p.19
4 Chemical Strip Out	Strip	Choose stripper - p.10-11	7300, 7200, or Nassco® Black - p.14-15	Auto scrubber - p.21 Orbital floor machine - p.20 Doodlebug - p.13 Scraper - p.19
	Neutralize	Choose neutralizer - p.12	5100 or Nassco® Red - p.14-15	Damp mop & bucket - p.18-19 Wet/dry vac - p.22
	Finish	Choose finish - p.5-7	No pad needed	Finish mop & bucket - p.16 and 19 Air mover - p.19

PREVENTATIVE MAINTENANCE

Preventative and protective floor maintenance is less expensive than any other form of maintenance or restoration. While not necessarily considered as part of a formal floor program, it should always be your first line of defense. Entrance or walk-off matting will prevent about 90% of soil from entering your building, and floor protectors will prevent scratching and scuffing from furniture and other forms of potential damage.

INTERIOR AND EXTERIOR ENTRANCE MATS

Because of the many combinations of size, color, shape, fabric, thickness and type of matting, it's best to let an experienced Nassco® professional help design a custom matting program for your facility. We will do a walk-through of your building with you and discuss

the areas and ways that various types of mats can help increase productivity and protect both floors and people. Shown are just a small sample of the options available. Call us at 800-729-6726 to schedule a consultation.

Waterhog Classic Mats

FLOOR PROTECTION

You can protect hard floor surfaces from furniture scratches and other damage with protective Slip-Over® Floor Savers®, Slip-On® Floor Savers, Wrap Around® Floor Savers, CasterTire™ Floor Savers, felt pads and strips, Gripper™ pads, sleeve floor protectors, and sliders. With a nominal investment to cover the legs of chairs, tables and other furniture, you'll preserve the integrity and beauty of your hardwood, vinyl, VCT, finished concrete and ceramic tile floors. Below are just a few of the options. Visit nasscoinc.com or see our catalog for all styles and sizes.

CHOOSING THE RIGHT FLOOR FINISH

There are three main considerations when choosing a floor finish:

- 1 Your Floor Care Maintenance Profile**
- 2 Your desired level of gloss and durability**
- 3 Your desired burnishing responsiveness**

Floor Care Maintenance Profile

While all maintenance programs are individual to some degree, our experts have categorized typical programs into three Floor Care Maintenance Profiles.

Limited Maintenance Profile.

Dust or damp mopping is the primary method for cleaning while auto scrubbing is done infrequently or not at all. Burnishing is infrequent or not part of your program.

Standard Maintenance Profile.

Dust/damp mopping is done regularly but auto scrubbing is the preferred method for cleaning. Burnishing may or may not be included, but if it is, it is only done 1-4 times per month.

High Maintenance Profile.

The highest level of maintenance and care for floors. Daily maintenance is done by auto scrubbing, and burnishing is performed 2-4 times per week.

Desired level of gloss and durability

Gloss level and durability/hardness go hand in hand. The initial gloss and durability potential of your floors comes from a combination of the chemistry of your chosen floor finish plus the number of coats you apply. The higher the “solids” percentage, the higher the initial gloss and durability potential.

THE RULE OF 100

For any floor finish, the solids percentage multiplied by the number of coats you lay down should equal 100 to achieve optimum gloss and hardness potential.

Desired burnishing responsiveness

If frequent burnishing is a regular aspect of your floor care program, consider a finish with “High” or “Very High” burnishing responsiveness from the chart below. These finishes will continue to produce a wet-look gloss to your floors from burnishing, for ongoing shine.

Product	Solids	Floor Care Profile	Initial Gloss & Durability	Burnishing Responsiveness
Nassco® Pro Series 155 Floor Finish	22%	Limited	High	High
P&G Pro Line High Affinity #16	22%	Limited	High	High

RESILIENT FLOOR COATINGS AND SYSTEMS

Nassco® Pro Series 155 High Performance Floor Finish

Combines deep gloss, high durability and ease of use. Acrylic polymers produce a beautiful, long-lasting shine with black mark and scuff resistance. Ideal for limited maintenance programs yet also responds to daily burnishing. Dries in 30 minutes under normal conditions. Slip resistant. 22% solids.

New and Improved Next Generation Technology!

3M™ Scotchgard™ Resilient Floor Protector

For linoleum, vinyl tile (VCT) and vinyl sheet flooring. Scotchgard Resilient Floor Protector is a new and improved high-performance protective floor coating that is 4 times more durable than leading traditional acrylic floor finishes. Floors are protected in just 2 coats of finish. **Topcoat after full strip or Topcoat after deep scrub** (Scotchgard Resilient Floor Protector may be applied over floor finish to increase gloss while providing durability benefits.)

- Zinc free and formulated without other heavy metals
- Low odor / Low VOC
- Use 3M Tan Burnish Pad 3400 to produce a brilliant gloss while removing scuffs and black marks – see p.14
- More resistant to sanitizer than traditional acrylic floor finishes
- National Floor Safety Institute (NFSI) certified as providing “High Traction”

3M™ Scotchgard™ Floor Finish

Scotchgard™ Low Maintenance 18 Floor Finish

Low maintenance, economical floor finish is a great choice for low traffic areas such as patient rooms, classrooms and offices. Designed with a quick-drying formula, it is responsive to both spray buffing and burnishing. Use on most hard floors maintained with machines of any speed. 18% solids.

Scotchgard™ Low Maintenance 25 Floor Finish

Exceptionally tough and durable, this floor finish dries quickly for outstanding image and film clarity. The versatile, universal formula is great for low to medium traffic areas and is the best choice for terrazzo floors with lower frequency burnishing programs, although it works with almost any maintenance method and any speed. 25% solids.

Scotchgard™ UHS 25 Floor Finish

Best choice for high traffic areas like retail, Class A and high profile buildings as well as high traffic entryways and hallways. Quick drying, easily repaired coating gives you the deepest “wet look” for high frequency burnishing programs, with ultra high speed machines (1,500 rpm and higher). 25% solids.

Cornerstone Floor Finish Sealer

Seals and beautifies stone floors in one step. Adheres securely and provides gloss on hard to maintain stone surfaces such as terrazzo, concrete, quarry tile, brick and unglazed ceramic. Works with equipment of any speed.

RESILIENT FLOOR COATINGS AND SYSTEMS

P&G Pro Line® Floor Finish

Pro Line® Presence™ High Performance Low Maintenance Floor Finish #13

High initial shine is good for both slow or fast drying conditions. Designed for durability with flexible maintenance patterns. CARB VOC Compliant and slip resistant. 18.85% solids.

Pro Line® Dexterity™ Highly Versatile Floor Finish #15

High initial shine with exceptional wear resistance. The most versatile of the P&G Pro Line finishes. Can be applied anywhere and will respond well to moderate burnishing. CARB VOC Compliant and slip resistant. 20% solids.

Pro Line® High Affinity™ Durable Premium Floor Finish #16

Delivers a high initial depth of gloss with an exceptional gloss build. Excellent burnish response designed for low to medium maintenance patterns. CARB VOC Compliant and slip resistant. 22% solids.

Pro Line® Grand Opening Premium Ultra High Speed Floor Finish #17

For daily burnishing and an unsurpassed wet look shine. Exceptional gloss build and burnish response. Can be used with propane or electric burnishing. CARB VOC Compliant and slip resistant. 20% solids.

Spartan® Floor Finish

On an' On Floor Finish

Excellent for high traffic, limited maintenance programs. Durable floor finish offers long lasting shine. It requires fewer coats, levels smoothly and applies with ease. Non-buff, metal interlock finish may be spray buffed. 25% solids.

iShine® Floor Finish

Durable finish designed for high traffic areas. It features patented, optically enhanced polymer technology to amplify overall gloss and clarity of floors. For standard maintenance and high speed applications. 25% solids.

The Fixx™ Floor Finish and Sealer

Designed for high and ultra high speed buffing, The Fixx Floor Finish and Sealer is great for high traffic areas with standard maintenance programs. It provides initial deep gloss that will increase over time. 25% solids.

STONE FLOOR SYSTEMS

3M™ Scotchgard™ Stone Floor Protection System

For marble, terrazzo, polished concrete and other natural stone, Nassco recommends a system technology from 3M that will revolutionize your floor program with productivity advances and year after year savings. **Scotchgard Stone Floor Protector** is a high performance floor surface hardener and protective clear coat for porous stone. It produces a glossy, dust-repellent and watertight surface that is easy to repair and maintain, and produces a remarkable, long-lasting shine.

- Annual savings in material and labor in excess of 50% vs. traditional acrylic floor finishes!
- Eliminates the need for future stripping and deep scrubbing, reducing labor and facility downtime
- Creates a high traction gloss that can help reduce slips, falls and injuries - Certified by National Floor Safety Institute (NFSI) as "High Traction" under ANSI B101.1 WET test (when floors are wet)
- Virtually eliminates scuff/black marks on floors
- Floors are available for immediate traffic after application
- Repels dust and inhibits it from forming
- Features environmentally preferable* components for greener cleaning

As a complete process that includes 3M Trizact™ Diamond HD Discs for your first (and only) restoration, along with Scotch-Brite™ Purple Diamond Floor Pad Plus and Neutral Cleaner Concentrate, 3M's Stone Floor Protector system is an innovation in floor care that offers end-to-end restoration, protection and maintenance.

*As defined by Executive Order 13423 titled, "Strengthening Federal Environmental, Energy and Transportation Management".

WOOD FLOOR SYSTEMS

Sport Kote® Wood Floor System

Wood floor care is made easy with 24-hour prep Sport Kote system. From prep to finish to maintenance, Sport Kote offers exceptional performance with significant time and labor savings, reduced gym floor downtime, and a one-year guarantee.

Sport Kote® Water Based Urethane Wood Finish

Full-matrix, self cross-linking technology makes this ultra-rapid curing finish highly durable. No sanding, catalyst or messy glues, just pour and apply. Play on it the next day and it's good for one year!

Sport Kote® PC Water Based Urethane Wood Finish

The next generation of Sport Kote® wood finish, made with Polycarbonate for additional durability, gloss and scuff/scratch resistance. Especially designed for gyms that take a beating year in and year out.

Sport Clean Neutral No-Rinse Wood Floor Cleaner

Specially formulated to work with Sport Kote's unique polymer technology, this restorative cleaner promotes bond resilience and durability in the finish while extending the life of the floor. No-rinse, neutral formulation makes it ultra simple. Use with Nassco® Pro Series Red Pads for scrubbing.

Citrus Scrub and Shine Floor Prep

Eliminates restorer buildup. Contains no wax or polymers. Removes embedded soil and repairs scuffs, scratches and dull spots while eliminating powdering. 6-ounce dilution designed for use through auto-scrubbers. Use with Nassco® Pro Series Preparation Pads as a deep scrub cleaner prior to recoating at 8 ounces per gallon.

40% Oil Modified Gym Floor Finish

High gloss, polyurethane finish is perfect for gym floors, racquetball courts, dance floors and other wood surfaces. Non-yellowing, high shine formula resists scuffs, rubber marks and dirt penetration. MFMA approved and UL classified. Covers up to 500 square feet per gallon.

“ The floors had a ton of wax and the Nassco® Pro Series Heavy Duty Stripper tore right through it like nothing. Also, the Nassco® Pro Series High Performance Floor Finish goes down nice and has great shine. ”

CHOOSING A FLOOR STRIPPER

Stripping is the most labor-intensive aspect of floor care. When soil and buildup can no longer be removed with a scrub-and-recoat procedure, or when there is little to no finish left on your floor, it is time to strip and start fresh.

Choose your floor stripper based on:

1 Coats of finish to be removed

The number of coats that must be removed from your floor will help you determine the level of aggressiveness you need in your stripper. The higher the number of coats, the more aggressive your stripper will need to be. In addition, the longer it has been since your finish was initially applied, the more aggressive a stripper you will need.

2 Burnishing Frequency

The more frequently your floor finish has been burnished, especially at higher speeds, the harder your finish will have become over time. The harder your finish, the more aggressive you will need your stripper to be to remove it.

3 Odor Profile

In certain situations the odor profile of a chemical will be more of a consideration than others. A low odor profile is a good choice for buildings like healthcare facilities, retail establishments, schools, public buildings, or wherever there may be odor sensitivities.

The number one mistake made in stripping is thinking that “the more chemical the better.” If there are more coats present, a more aggressive stripper is needed. Allow the stripper to do its work by following directions and dilution precisely.

		Coats of finish to be removed	Burnishing Frequency	Odor Profile
STRIPPER AGGRESSIVENESS ↑ HIGH ↓ LOW	Nassco® Pro Series 150 Heavy Duty Floor Stripper	12+	High	Medium

INTERIM MAINTENANCE GLOSS ENHANCERS

Floors will need fewer high-cost maintenance procedures if they are kept on a regular daily and interim maintenance schedule. Your program may include periodic burnishing and you won't need chemicals for that. However if burnishing is no longer working as well

and you want to bring back the original luster of your floor, you will need one of these chemicals, which will enhance and protect your regular finish.

Diamond Shield Floor Enhancer and Protector

Restores floors to an amazing level of shine. Simply wet mop on, then burnish at a speed of 1500 rpm or greater with **3M 3300 Natural Blend White Pad** to bring back the awesome to your floors. Dilute in cold water 1:64 (2 oz. to 1 gallon)

Item #	Pk/Qty

RESTORATIVE MAINTENANCE FLOOR PREPARATION PADS

Floor preparation pads are the new green-blue. In recent years preparation pads have replaced most green and blue floor pads in the scrub-and-recoat process of floor care programs concerned with

optimizing productivity and operating in a more environmentally conscious way.

3M™ Scotch-Brite™ Surface Preparation Pad (SPP)

- Prepares wood, vinyl tile, sheet vinyl, marble, terrazzo and concrete floors for new coats of floor finish
- Requires only neutral cleaner or water to effectively remove 2-4 coats of most floor finish
- Safer and more environmentally preferable than traditional stripping

3M™ Doodlebug

- Great for stairs, corners, hard to reach places, and detail work
- Durable swivel lets holder twist and turn to reach corners and other hard-to-get-at places
- Use with Doodlebug Pad holder and durable Metal Tip Threaded handle
