

Champion a healthier learning environment

GOJO Hand Hygiene Program for Schools

Lessons learned:
**A 51% reduction
in absenteeism⁵**

In a study conducted in schools,
absenteeism caused by illness was 51%
lower in classrooms that used PURELL®
regularly and implemented a hand
hygiene educational program versus
classrooms that did not.

**The GOJO Hand Hygiene
Program for Schools**

A smart start for learning

Hand hygiene is essential to a healthy learning environment

But how do you fit this critical program into a busy school day?

Illness is responsible for more than **144 million lost school days** per year¹. Absenteeism can cause lost learning opportunities that impact student achievement.

Absenteeism robs students of learning time.

One of the challenges you face in helping kids achieve their fullest potential is keeping students ready and able to learn; and staying off the absentee list. According to the Centers for Disease Control and Prevention, hand hygiene is one of the most important steps in preventing illness and stopping the spread of germs to others.

Hand Hygiene – Vital to success but difficult to achieve

With all the demands of a busy school day, proper hand hygiene isn't easy. Soap and water may not be available in the classroom, and restroom visits after each cough or sneeze aren't practical. **Studies show only 53% of students wash their hands after bathroom use and only 18% use soap**².

GOJO makes Hand Hygiene as easy as 1,2,3.

1. GOJO Foam Soap has a soft feel kids love – and that encourages use.

GOJO Green Certified Hand Soaps

GOJO offers a variety of luxurious, green certified foam soaps with selections that have vivid colors and spa-like fragrances or fragrance- and dye-free options. Certified by EcoLogo™, GOJO® green certified hand soaps help support a clean environment with environmentally responsible packaging and formulas.

GOJO refills are SANITARY SEALED™

Why? A recent study by the University of Arizona on refillable bulk soap reservoir systems showed that 25% contained potentially harmful bacteria³.

GOJO factory-sealed refills are protected from contamination and each include a fresh nozzle.

Coliform bacteria left on hands after washing with contaminated bulk soap.

2. PURELL® Advanced, America's #1 instant hand sanitizer, makes it easier to create your healthy learning environment.

Ounce for ounce, PURELL Advanced Instant Hand Sanitizer out performs other leading sanitizers.⁴ The Touch-Free dispenser and foam formula encourages use. Place it in classrooms, lunchrooms, and other shared areas.

3. GOJO innovative educational materials help make wellness an everyday lesson.

The GOJO Hand Hygiene Program includes educational tools to help students learn the importance of hand hygiene and practice it often. The materials feature CLEAN GENE™, our hand hygiene expert and friend who helps make every lesson engaging and memorable. Kids help CLEAN GENE fight germs and learn how to practice good hand hygiene in videos and online games. Hand hygiene posters are available to use in classrooms and common areas.
