

Simplify Hand Hygiene Compliance

GOJO Hygiene Management System
for Meat Processors

Compliant Hand Hygiene Can Be Complicated.

Opportunities for cross contamination are everywhere employees are.

Despite its importance, hand hygiene is often overlooked due to confusing product choices, vague regulatory requirements, language barriers and competing priorities.

Poor employee hygiene can cause:

- Litigation
- Brand damage
- Quality degradation
- Retained product
- Downtime

Ultimately costing time, money, reputation...and customers.

GOJO Simplifies Compliant Hand Hygiene

The GOJO Hygiene Management System simplifies a complex landscape of products, regulations and worker compliance issues.

It's a comprehensive program including effective products and systems people will use. The products meet federal guidelines and help reduce risk. It's a simple, hassle-free system complete with compliance-building tools that are easy to implement.

GOJO Hygiene Management System

Effective. Compliant. Simple.

Effective

Products that balance efficacy and skin-mildness with brands people know and trust.

E1 Foam Handwash

- Effective cleanser that removes fats, oils and other food processing soils
- Mild enough for high frequency washing
- Proven to maintain skin moisture levels
- Dermatologist tested: non-irritating and hypoallergenic
- Use with PURELL® E3 Rated Instant Hand Sanitizer
- Kosher approved

E2 Foam Sanitizing Soap

- One-step hand cleanser and sanitizer
- Effectively removes fats, oils and other food processing soils
- Exceeds the 50 ppm chlorine equivalency standard for sanitizer status
- Effective against common spoilage and food borne illness organisms
- Dermatologist tested: mild
- Kosher approved

E3 Rated Instant Hand Sanitizer

- No rinse hand sanitizer
- Used after and between handwashes to help maintain hand hygiene
- Exceeds the 50 ppm chlorine equivalency standard for sanitizer status
- Effective against common spoilage and food borne illness organisms
- Dermatologist tested: non-irritating and hypoallergenic
- Kosher approved

Compliant

Meets Federal Guidelines

Designed to enhance your HACCP program, these products meet federal guidelines for use in all areas of your facility. All three products are listed with NSF International and include documentation to demonstrate compliance.

Compliance-Building Tools

Employees also need to comply. With language-neutral training, the program helps teach proper hand hygiene to maintain high quality and limit cross contamination. But the program only works with products employees will use. GOJO and PURELL brand products are well known and accepted as high quality and skin friendly components of an effective hand hygiene system.

Simple

A system designed to overcome common obstacles of effective implementation.

Visual Cues

Shapes, colors and numbers are used to help workers identify and differentiate between products. The visual cues also help inspectors and customers recognize and understand your hand hygiene program.

Training Program

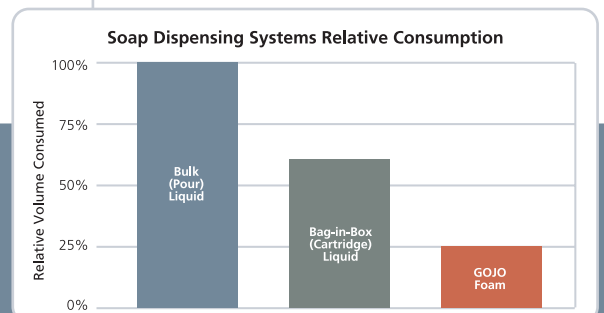

- Language neutral video - why, when and how to use GOJO® E-rated products
- Trainer's guide to help you teach workers the program
- Materials to ensure workers understand and know how to comply

Durable dispensers for wash-down environments.

Cost Effective & Reliable

- GOJO foaming soaps are more cost effective than liquid soaps
- High volume and sanitary-sealed refills that result in less time, cost and waste
- Dispensers field tested in food processing environments

Significantly more handwashes per volume.

Pick the option that best fits your HACCP program.
