

Simplify Hand Hygiene Compliance

NEW TFX™ Touch Free Dispensing System
for Food Processing Facilities

Opportunities for cross contamination are everywhere.

The spread of *spoilage organisms* and *environmental pathogens* can impact your facility:

- Plant shut-down due to contaminated product
- Product is unsuitable for sale
- Loss of reputation, and brand damage
- Loss of customer loyalty

Did you know?

Bulk hand soap can contribute to the *cross contamination problem*.

- Bulk soap dispensers (the kind you refill from a gallon jug) are open to the environment and can compromise your HACCP program.
- Bacteria grow inside because it isn't practical for maintenance personnel to properly clean and sanitize them each time they are refilled.
- **Bacteria may spread to unsuspecting users, putting your employees, product and business at risk.**

A recent study,¹ conducted by microbiologists at the University of Arizona, found that **25% of bulk soap dispensers** contain soap with unsafe levels of bacteria.

Is it worth the risk?

The TFX™

Program

GOJO® Hygiene Management System

GOJO offers a comprehensive program that supports effective and compliant hand hygiene.

- Compliant with federal guidelines and listed with NSF
- Training program complete with:
 - A language-neutral training video
 - Trainer's guide
 - Visual cues that help workers identify and differentiate between products

Touch Free Dispensing System

+ *The GOJO Hygiene Management System*

= A comprehensive program that includes *effective products* and *systems that people will use.*

Product

GOJO® and PURELL® brand E Rated products
