What Do Your Showers Signal?

The GOJO Promise

Only GOJO enables you to give **every member** a consistently refreshing shower experience **every time** while dramatically simplifying your maintenance routine.

Over fifty years ago GOJO invented the first portion controlled soap dispenser, and thousands of patents later no system is more robust. Better yet, your dispensers are guaranteed for life.

Our quality commitment extends to our new botanically infused body wash, shampoo, and hand soaps. New product formulations are carefully blended with natural moisturizers, aromatherapy extracts and skin conditioners. All products have earned EcoLogo™ certification to be respectful to our environment. They are readily biodegradable, free of phosphates and are never tested on animals.

Importantly, every GOJO dispenser refill is SANITARY SEALED™ at the point of manufacture. Unlike unhealthy pour fill systems, GOJO body wash systems help prevent tampering, contamination, and theft. These high capacity foam cartridges yield up to twice as many showers as a similarly sized liquid system.
