MOP BASICS

Selecting the right commercial mop for your needs and facility is a very important decision. Whether it's a wet mop for cleaning, a finish mop for applying floor finish, or a dust mop, there is a lot to consider before purchasing. This booklet will help you understand what's most important to know about mops and accessories, in order to choose the appropriate one(s) that will be most productive for your facility needs.

Here's what you'll learn about in the following pages:

- Mop Attributes
- Mop Construction Features
- Mop Selection Guide

ABOUT WET MOPS

Wet Mop Attributes

Absorbency

Absorbency is a measure of how much liquid a mop can pick up and hold. Mops that are more absorbent enable faster floor dry times after mopping, for improved worker safety and facility appearance. The highest absorbency mops are made of rayon and cotton.

Durability

Durability refers to how long a mop will perform before it needs to be replaced. Synthetic, blended fiber and microfiber mops are more durable than 100% cotton mops.

Release

Release is the ability of a mop to disperse liquid onto the floor or into the bucket during wringing. A higher release level allows faster and more complete wringing, as well as more efficient application of cleaning solutions on the floor. Rayon and synthetic mops offer the best release of liquids.

Launderability

Launderability is how many washing and drying cycles a mop can withstand before it starts falling apart and affecting performance. Synthetic, blended fiber and microfiber mops can be laundered more times, versus 100% cotton mops, before they degrade.

Wet Mop Construction Features

Headband

Headbands are wide 5" or narrow 1". 5" headbands can be used as a scouring pad to use on heavy soiling when paired with Jaw Style mop handles. 1" headbands can be used with Quick Change style mechanism.

5" Headband

1" Headband

Yarn

Choose Cotton, Nylon, Rayon, Synthetic, Blended yarn, or Microfiber depending on your application. The yarn material helps determine a mop's performance on the 4 attributes of absorbency, durability, release and launderability.

Tailband

Tailbands keep mop yarns in place to prevent them from tangling in furniture and equipment. Woven mesh tailbands increase productivity by providing greater floor coverage and smooth glide over floor surfaces.

Ends

Looped ends have better durability, longer mop life, and reduce fraying or de-plying. *Cut ends* are a more economical construction for general purpose mopping, and should not be laundered.

Cut

Looped

WET MOP SELECTION GUIDE

WET MOPS

Nassco® Pro Series Premium Wet Mop, 5" Headband

Nassco® Pro Series premium wet mops represent our best quality wet mop and score the highest marks on all four wet mop attributes. Premium Wet Mops are constructed of a 4-ply preshrunk blend of cotton, rayon, and synthetic fibers for maximum durability. They are pre-laundered to eliminate any break-in period so you can use them right out of bag. Launder in excess of 65 times with proper care without losing size. These mops absorb up to seven times their own weight.

- Made in the USA
- Material: 4-Ply Cotton/Rayon/Synthetic Blend
- Looped End
- Launderable

See p. 11 for wet mop handles

Nassco® Pro Series All-Purpose Wet Mop

Great all-purpose mop to use for quick spill clean up, disinfecting, and applying chemicals. Twisted blended fibers create a durable yarn that will not lint or leave strings behind. Mesh tailband holds together looped ends to avoid tangling. Color options help camouflage mop soiling. May shrink when laundered.

- Made in the USA
- Material: 4-Ply Cotton/Rayon/Synthetic Blend
- Looped End
- Launderable

WET MOPS (CONT.)

Nassco® Pro Series Economy Wet Mop

Cut end wet mops are your most economical solution for general purpose floor cleaning or for one time applications like floor stripper. Requires a 35 to 40 minute break in period. Cotton Economy Wet Mops are a great solution for budget-conscious educational institutions, office buildings or industrial buildings without laundry facilities.

- Made in the USA
- Material: 4-Ply Cotton
- Cut End
- Non-laundryable

See p. 11 for wet mop handles

Nassco® Pro Series Rough Surface Wet Mop

This innovative mophead is constructed to be used on rough, abrasive, anti-skid floors. Fine quality cotton and polyester fibers are twisted and knitted tightly to create a longer lasting, low-lint mop with excellent absorbency for greater coverage of large floor surface areas. Excellent for industrial, foodservice and kitchen applications.

- Material: Polyester/Cotton Blend
- Looped End
- Launderable

See p. 11 for wet mop handles

Nassco® Pro Series Microfiber Tube Wet Mop

The preferred option for healthcare applications. Microfiber Tube Wet Mops combine the quality of microfiber material while maintaining compatibility with traditional style mop tools. Advanced knitted microfiber tubes are bound by a mesh tailband to increase mophead spread and reduce labor. These mops will not tangle, leave strings, or snag. Lightweight, lint-free, easy to use, easy to wring, and fast drying. They will withstand hundreds of laundry cycles.

- Material: Microfiber
- Looped End
- Launderable

MICROFIBER CLEANING SYSTEMS

Nassco® Pro Series Microfiber Cleaning System

4-color flag coding allows HACCP compliance with a single pad instead of four. Nassco's microfiber pads have the highest fabric weight in the industry and last hundreds of launderings. 100% split microfiber captures particles and allows for a greater saturation for proper chemical dwell time. Smooth aluminum frame construction has hook and loop strips that can be used with wet or dry microfiber pads. Velcro® strips are channel fit and replaceable. Durable aluminum telescopic handle is lockable while extending from 34" to 60".

FINISH MOPS

Finish mops are used to apply floor finish. They have high absorbency, good durability and a high release level. Choose looped end or flat finish mops.

Nassco® Pro Series Premium Finish Mop

Nassco's Pro Series Premium Finish Mop glides smoothly along surfaces and releases finishes rapidly and completely with a lint-free shine. This 100% nylon finish mop holds liquid wax suspended by surface tension, not within its fibers, for the highest release level.

- Made in the USA
- Material: Nylon
- Looped End

See p. 11 for wet mop handles

Item #	Yarn Color	Size	Pk/Qty
N-02427	White	Large	6/CS

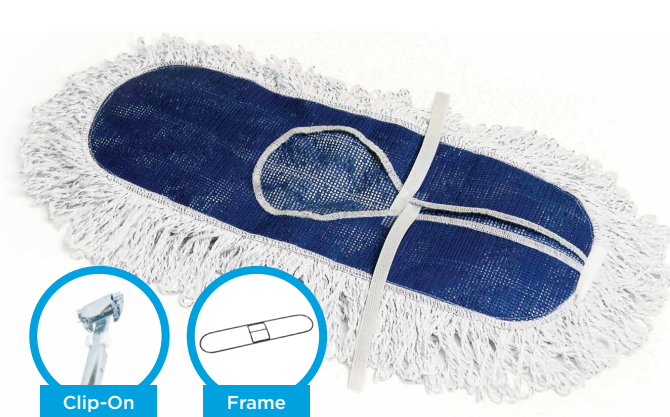

Nassco® Pro Series All-Purpose Finish Mop

Blue stripes on the mop designate it for finish applications. Hygrade 4-ply rayon yarn provides controlled release of floor finish. Rayon absorbs moisture well, has good release, and is ideal as a finish mop. Less lint, longer lasting, and faster drying.

- Made in the USA
- Material: Hygrade Rayon
- Looped End

See p. 11 for wet mop handles

ABOUT DUST MOPS

Dust Mop Attributes

Dust Pick-up

Dust pick up refers to the ability of a mop to remove dust and dirt from a surface. Synthetic and microfiber mops have the highest degree of dust pick up.

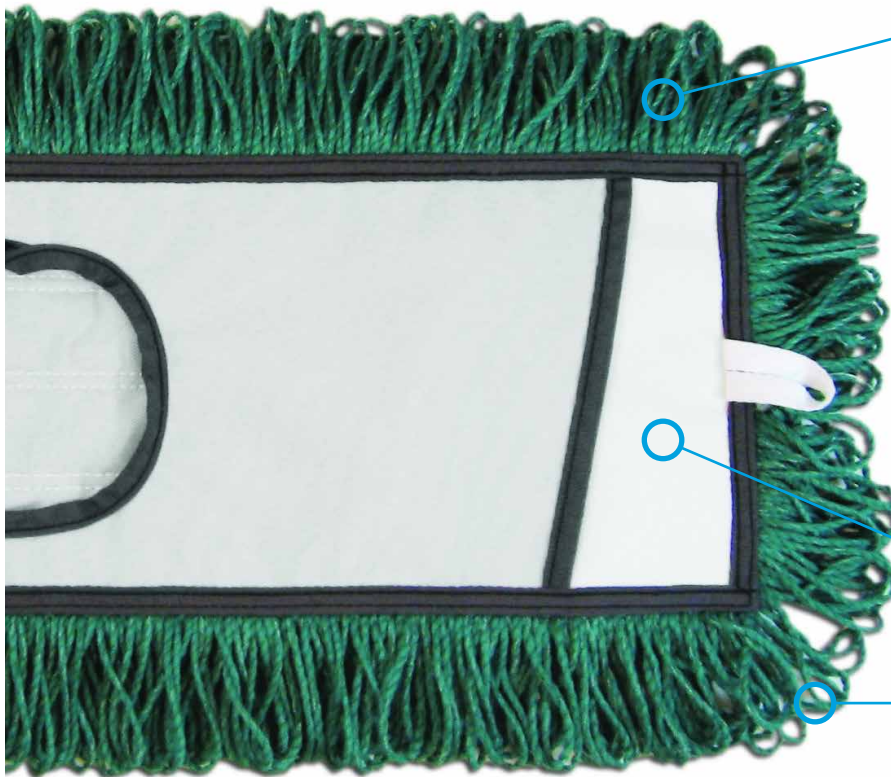

Launderability

Launderability is how many washing and drying cycles a dust mop can withstand before it starts falling apart and affecting performance. Synthetic, blended fiber and microfiber mops can be laundered more times, versus standard cotton mops, before they degrade.

Durability

The durability of a mop is a measure of how long it will perform before needing to be replaced. Synthetic and microfiber mops are the most durable.

Dust Mop Construction Features

Yarn

Choose Cotton, Synthetic or a Hybrid Microfiber/Synthetic. Cotton is economical, accepts dust treatment, and picks up large debris. Synthetic mops require no dust treatment, pick up and retain dust through static attraction, have excellent durability and good launderability. Hybrid yarns pick up and retain dust through static and tiny microfibers, are long-lasting and durable, and offer great launderability.

Backing Design

Slot pocket backing allows quick, easy setup for standard or breakdown mop frames.

Ends

Cut ends offer low initial cost and good dust pick up for general purpose dusting. Looped ends reduce tangling and fraying, have long durability vs. cut ends, and great launderability.

DUST MOP SELECTION GUIDE

Use the summary chart below to help identify the best type of mop for your application.

DUST MOPS

Nassco® Pro Series Premium Microfiber Dust Mop

Our finest and most durable dust mop, the Nassco® Pro Series Premium Microfiber Dust Mop is 100% looped fringe construction for maximum dust pick-up. Microfiber material has a positive electrostatic charge to trap fine particles and keep them until the mop is laundered. Spun loop fringed pad construction also picks up heavy debris. Lasts hundreds of launderings. Has standard slot pocket construction for use with Nassco® Pro Series Dust Mop Frames.

- Material: Microfiber
- Looped end
- Launderable

See p. 15 for dust mop frames

N-02385	Yellow Fiberglass	1" x 60"	12/CS
N-02386	Vinyl Coated Steel	15/16" x 60"	12/CS

CHEMICALS

Nassco® Pro Series 95 Dust Mop Treatment

Gathers dust and attracts it to mops and cloths - for cleaner dust-mopped surfaces. Oil based formula is great to use on floors, wood, concrete, auto interiors, and more. Easy spray-on formula has lemon fragrance. VOC compliant.

Item #	Description	Pk/Qty
N-02122	95 Dust Mop Treatment	14 OZ 12/CS

Nassco® Pro Series 28 Neutral Floor Cleaner (concentrate)

Rinse-free convenience and pH neutral safety. 28 Neutral Floor Cleaner is a great choice for daily maintenance of floors, walls, and woodwork surfaces not harmed by water. Won't dull or harm floor finishes and is safe for painted surfaces. Highly concentrated. Dilute 1:128 to 1:32 based on soil level, or 1:128 to 1:64 in automatic scrubbers.

N-02012	28 Neutral Floor Cleaner	1 GAL 4/CS
N-02011	28 Neutral Floor Cleaner	5 GAL PAIL

Nassco® Pro Series 130 Neutralizer, and Concept 915

- Removes ice melt residue from carpets and floors
- Eliminates unattractive white haze to ensure superior gloss, durability and appearance of floors
- Use between floor stripper and floor finish to protect and extend life of floor finish by removing surface alkalinity and abrasive residue
- Nassco® Neutralizer: Dilute 1:64
- Concept 915: Fill mop bucket with 3 to 5 gallons of water and add 1 packet
